

Dear Editor and Good Citizens of Pawnee County,

It's happened again. It's 2 AM and I've awakened from a fitful sleep with an anxiety attack. I have stood by my entire adult life and barely paid attention to my country's slide into a political quagmire but now the waters have risen to my neck and I can no longer sleep soundly nor ignore the creep of governmental intrusion into the life of my family and community. I am a modern day Paul Revere crying out, "They are coming!" Finally they are literally at my door with a **Smart Meter**. OG&E, unwittingly doing the bidding of global government, wants to install a surveillance device on my home that will be fairly innocuous at first but eventually will know every electrical device in my home, when I used it, will charge me more for energy used between 2 and 7 PM, and when I consume too much power for the global Smart Grid purposes, can turn my hot water heater down and my air conditioner off. To add insult to injury, the device is not safety tested, strobes extreme amounts of RF energy into my home and then if that were not enough, transmits my personal data that has been collected out into the neighborhood via a radio signal, highly vulnerable to hackers. They will have total control over this personal data that they will keep on file and may sell to the highest bidder or share with government. (Other electric companies can adapt their digital meters to do much of what OG&E is proposing so don't think that you will be safe if you are non-OG&E.) But this immediate assault on my castle is only a small symptom of a larger, far more intrusive program. It's called **UN Agenda 21**. This humongous document of over 300 pages was concocted in 1992 at the Earth Summit in Rio de Janeiro. Starting with Bush Sr., whose mantra was 'one world government'; all successive Presidents have advanced the implementation of this program culminating recently with Obama's formation of his *President's Rural Council*. This document is very complicated and so far-reaching that you simply won't believe what the United Nations has in store for us. "Sustainable Development" is their code word for overriding our Constitution and completely changing the economic and social structure of our American way of life. Environmentalism and Biodiversity are the vehicles that they will use to control us and eradicate life as we know it. They want to reduce world population to 1 billion and control our land and water. They especially target our rural way of life in order to return the land to its natural state and force us into urban areas. Neighbors, I am not making this up. I am sounding the alarm and asking you to investigate the greatest threat to our freedom that we have ever known.

Signed,

A Concerned Citizen of Pawnee County
